

First Choice For Storage Solutions

A century of **Excellence**... a legacy of **Quality**

Built on a practice of comprehensive research and development and efficient production processes, Republic products serve as industry benchmarks for quality and design. For over 100 years, Republic has manufactured quality storage products. Considering our nationwide network of dedicated distributors, we are always a nearby source for problem solving and applications assistance.

Clip Shelving — The Republic Advantage

Designed for both simplicity and flexibility.

Open and closed units, along with a full line of accessories are available to customize your unit.

- One-piece shelving posts up to 17' 1" high, eliminate the need for field splicing.
- Custom post heights are available on 1-1/2" increments from standard heights.
- Welded upright assemblies are available up to 12' tall.
- Series 2000 shelves are roll formed with box formations in the front and rear of the shelf for high capacity ratings, without additional reinforcing.
- Custom shelf widths 24"–60" in 6" increments provide better utilization of space.
- Our compression clip is the most imitated clip in the industry. The 13 gauge clip formed with 2 rectangular lugs engages square holes for more rigidity and maximum bearing on upright posts. Clips allow for rapid repositioning of shelves, with 1-1/2" vertical shelf adjustability, resulting in easier assembly.
- Mezzanine, multi-level, and high-rise capable.

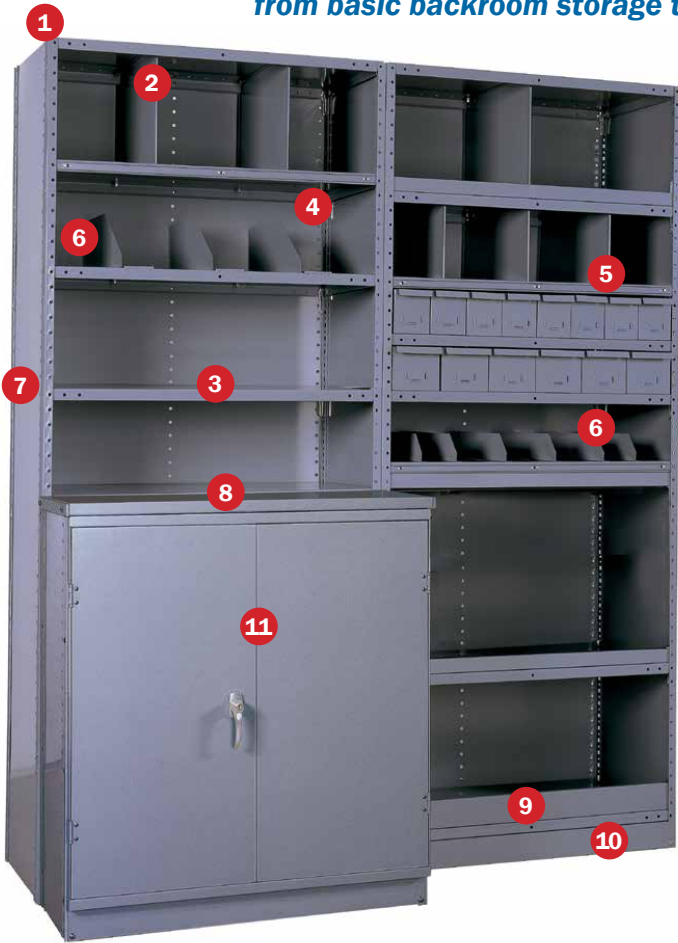

With great products, people, and service, Republic is your preferred provider for storage solutions.

Industrial Clip Shelving – Accessories

Full Height Dividers attach to shelves to create bins in the shelving unit. Made from 22 gauge steel, they are formed with beaded ends for clear access to shelf space. Top and bottom flanges are punched with holes to attach to shelf using push-in plastic clips.

Angle Dividers are used to partition surfaces. Made from 22 gauge, they have a 3/4" return flange on the bottom that allow them to be bolted to shelf surfaces.

Heavy Duty Sliding Dividers of 18 gauge steel may be used for more rugged storage applications.

Label Holders run the full width of the shelf and accept inserts for content identification.

Bin Fronts of 18 gauge steel keep small parts and packages on the shelf. The top and bottom are flanged so the bin front may be used as a card holder.

Swinging Doors provide lockable and clean storage.
